

July 2010

**Florida Department of Education
Curriculum Framework**

Program Title: Computerized Woodworking
Specialization Tract: Mechanical Design and Fabrication
Career Cluster: Manufacturing

CCC	
CIP Number	0615080501
Program Type	College Credit Certificate (CCC)
Program Length	12 Credit Hours
CTSO	SkillsUSA
SOC Codes (all applicable)	51-4012
Targeted Occupation List	http://www.labormarketinfo.com/wec/TargetOccupationList.htm

Purpose

This certificate program is part of the Engineering Technology AS/AAS degree program (0615000001).

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, which is part of an AS or AAS degree program and prepares students for entry into employment (Rule 6A-14.030, F.A.C.).

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the manufacturing career cluster; provides technical skill proficiency, and includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of the manufacturing career cluster.

The content includes but is not limited to maintenance techniques, computer aided drafting/design skills, technical communications, maintenance and operation of various industrial components, quality control and testing, material handling protocols, and proper usage of tools and instrumentation.

Laboratory Activities

Laboratory activities are an integral part of this program. These activities include instruction in the use of safety procedures, tools, equipment, materials, and processes related to these occupations. Equipment and supplies should be provided to enhance hands-on experiences for students.

Special Notes

Career and Technical Student Organization (CTSO)

SkillsUSA is the appropriate career and technical student organization for providing leadership training and reinforcing specific career and technical skills. Career and Technical Student Organizations provide activities for students as an integral part of the instruction offered. The activities of such organizations are defined as part of the curriculum in accordance with Rule 6A-6.065, F.A.C.

Accommodations

Federal and state legislation requires the provision of accommodations for students with disabilities as identified on the secondary student's IEP or 504 plan or postsecondary student's accommodations plan to meet individual needs and ensure equal access. Postsecondary students with disabilities must self-identify, present documentation, request accommodations if needed, and develop a plan with their postsecondary service provider. Accommodations received in postsecondary education may differ from those received in secondary education. Accommodations change the way the student is instructed. Students with disabilities may need accommodations in such areas as instructional methods and materials, assignments and assessments, time demands and schedules, learning environment, assistive technology and special communication systems. Documentation of the accommodations requested and provided should be maintained in a confidential file.

Standards

After successfully completing this course the student will be able to perform the following:

- 01.0 Generate and interpret computer-aided drawings.
- 02.0 Demonstrate proficiency in the principles, concepts and applications in woodworking and composite fabrication methods.
- 03.0 Demonstrate proficiency in the set-up and operation of manual and CNC machining centers.
- 04.0 Demonstrate proficiency in computer-aided drafting/ computer-aided manufacturing (cad/cam) software.

July 2010

**Florida Department of Education
Student Performance Standards**

Program Title: Computerized Woodworking
CIP Number: 0615080501
Program Length: 12 Credit Hours
SOC Code(s): 51-4012

This certificate program is part of the Engineering Technology AS/AAS degree program (0615000001). At the completion of this program, the student will be able to:

- 01.0 Generate and interpret computer-aided drawings - The student will be able to:
- 01.01 Apply current industrial computer aided-drawing practices.
 - 01.02 Construct geometric figures.
 - 01.03 Create and edit text formatted to industry standards.
 - 01.04 Use and control accuracy-enhancement tools for entity-positioning methods.
 - 01.05 Identify, create, store, and use standard part symbols and libraries.
 - 01.06 Control entity properties by layer, color, and line type.
 - 01.07 Use viewing commands to perform zooming and panning.
 - 01.08 Use query commands to interrogate database for entity characteristics.
 - 01.09 Plot drawings on media using layout and scale.
 - 01.10 Prepare drawings for flexibility of future editing and minimum file size.
 - 01.11 Apply standard dimensioning rules.
 - 01.12 Demonstrate proficiency importing and exporting various files types.
 - 01.13 Operate related peripheral devices.
 - 01.14 Read and interpret technical drawings to assure conformity of product.
 - 01.15 Demonstrate skill in assessing and reading schematics and drawings.
- 02.0 Demonstrate proficiency in the principles, concepts and applications in woodworking and composite fabrication methods - The student will be able to:
- 02.01 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a circular saw according to the manufacturer's recommendations.
 - 02.02 Apply the safe and proper use of and the basic adjustments and maintenance for a jointer according to the manufacturer's recommendations.
 - 02.03 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a planer according to the manufacturer's recommendations.
 - 02.04 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a router according to the manufacturer's recommendations.
 - 02.05 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a wood lathe according to the manufacturer's recommendations.
 - 02.06 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a plate joiner according to the manufacturer's recommendations.
 - 02.07 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a table saw according to the manufacturer's recommendations.
 - 02.08 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a jig saw according to the manufacturer's recommendations.

- 02.09 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a band saw according to the manufacturer's recommendations.
 - 02.10 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a drill press saw according to the manufacturer's recommendations.
 - 02.11 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a scroll saw according to the manufacturer's recommendations.
 - 02.12 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a reciprocating saw according to the manufacturer's recommendations.
 - 02.13 13.13 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a hand power drill according to the manufacturer's recommendations.
 - 02.14 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a brad nailer according to the manufacturer's recommendations.
 - 02.15 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a disc sander according to the manufacturer's recommendations.
 - 02.16 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a palm sander according to the manufacturer's recommendations.
 - 02.17 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a miter saw according to the manufacturer's recommendations.
 - 02.18 Demonstrate the safe and proper use of and the basic adjustments and maintenance for dust collection equipment according to the manufacturer's recommendations.
 - 02.19 Demonstrate the safe and proper use of and the basic adjustments and maintenance for a circular saw according to the manufacturer's recommendations.
 - 02.20 Set up and apply the use of clamps and vices.
 - 02.21 Apply and use basic safety equipment (PPE).
 - 02.22 Describe OSHA safety rules concerning PPE for eye protection.
 - 02.23 Describe OSHA safety rules concerning PPE for hearing protection.
 - 02.24 Identify common wood working joints.
 - 02.25 Demonstrate the use of wood glues, adhesives and epoxies.
 - 02.26 Describe rip, cross, miter, bevel, compound, and curved wood cuts.
 - 02.27 Identify wood stains and sealers.
 - 02.28 Identify basic construction woods.
 - 02.29 Identify standard lumber dimensioning methods.
 - 02.30 Identify basic woodworking layout tools.
 - 02.31 Analyze lumber distortions and defects.
 - 02.32 Define categories of hard and soft woods.
 - 02.33 Explain marking and squaring wood stock.
 - 02.34 Demonstrate basic CNC router set-up.
- 03.0 Demonstrate proficiency in the set-up and operation of manual and CNC machining centers. - The student will be able to:
- 03.01 Set up and maintain a manual lathe and mill.
 - 03.02 Demonstrate acceptable processes using a manual lathe and mill.
 - 03.03 Demonstrate acceptable control of machining processes.

- 03.04 Identify and define the physics of machine cutting metals.
- 03.05 Demonstrate the characteristics of machining cutting tools.
- 03.06 Define and identify parameters of cutting tool life.
- 03.07 Demonstrate efficient parameters in production processes.
- 03.08 Demonstrate the process to drill and layout holes to a specific size.
- 03.09 Identify baseline machining layout.
- 03.10 Identify manual machining procedures used in CNC programming.
- 03.11 Identify grinding machining practices and processes.
- 03.12 Identify thread types and tooling used in machining.
- 03.13 Identify metal alloys and their properties in machining.
- 03.14 Demonstrate job planning procedures in machining.
- 03.15 Demonstrate procedures to calculate cutting tool speeds and feeds.
- 03.16 Demonstrate methods for accessing machine RPM.
- 03.17 Identify coordinate and primary machining axes.
- 03.18 Define and describe Absolute and incremental coordinates.
- 03.19 Identify the five CNC drive components.
- 03.20 Demonstrate rapid travel and interpolation.
- 03.21 Identify coordinate and primary machining axes.
- 03.22 Identify and define industrial machining and turning centers.
- 03.23 Identify processes for program creation and data management.
- 03.24 Demonstrate acceptable procedures in starting CNC machines.
- 03.25 Demonstrate the CNC machine controls for set up and operation.
- 03.26 Demonstrate acceptable procedures to set up a CNC Machining center.
- 03.27 Demonstrate acceptable procedures to run programs using a CNC machining center.
- 03.28 Demonstrate acceptable procedures to generate a CNC program.
- 03.29 Demonstrate acceptable procedures in CNC job planning.
- 03.30 Identify cutting tools collets and holding fixtures.
- 03.31 Identify CNC tooling and applications.
- 03.32 Define CNC programming code words and conventions.
- 03.33 Define and demonstrate CNC program fixed cycles.
- 03.34 Explain basic use of CAD/CAM software and processes.

04.0 Demonstrate proficiency in computer-aided drafting/ computer-aided manufacturing (CAD/CAM) software –

The student will be able to:

- 04.01 Create CAD/CAM geometry for tool path processing.
- 04.02 Demonstrate procedures to import/export CAD/CAM files.
- 04.03 Demonstrate contouring using CAM tool path commands.
- 04.04 Apply pocketing using CAM tool path commands.
- 04.05 Demonstrate drill cycles using CAM tool path commands.
- 04.06 Demonstrate thread cycles using CAM tool path commands.
- 04.07 Demonstrate engraving using CAM tool path commands.
- 04.08 Construct lettering using CAM tool path commands.
- 04.09 Demonstrate nesting using CAM tool path commands.
- 04.10 Describe procedures for CAM post-processing.
- 04.11 Apply tool path verification for a CAM program.
- 04.12 Apply job set-up procedures for a CAM program.
- 04.13 Demonstrate ability to save, copy, delete, and rename computer files with Windows-based programs.

- 04.14 Create a CNC machining working portfolio.
- 04.15 Demonstrate the use of back plotting in a cam program.
- 04.16 Demonstrate how to modify an existing tool path.
