Professional Development

FLATE's online free Educational resources are intended to increase student's awareness and interests in the field of manufacturing and all the careers it represents. It features STEM centered, industry-connected lesson plans for K-12 school teachers and their students. Includes support materials for tours to high tech industries, and resources to help engage and recruit girls to STEM curriculum and support technology career pathways. In addition, educators can keep current with the latest National and International advanced technology education conference materials and presentations.
