CYBERSECURITY ACROSS DISCIPLINES
Faculty Development for Manufacturing & Automation

College of Central Florida in Ocala, FL (In-Person) | Building 20, Room 201
January 5 - 6, 2023 | 9:00 AM - 3:00 PM

COLLEGE of CENTRAL FLORIDA

NCYTE CENTER

FLATE — ADVANCED TECHNOLOGICAL EDUCATION CENTER — part of the FloridaMakes network

The National Cybersecurity Training and Education Center (NCyTE) invites you to attend a Faculty Development Academy.

Cybersecurity knowledge and abilities are needed in many of today's industries. The focus of this academy is to cross-train non-cybersecurity faculty to incorporate cybersecurity concepts and practices into their community/technical college program disciplines.

This 2-day in-person faculty development academy is targeted for **community college faculty in manufacturing and automation**. The workshops provide faculty with curriculum, content, and assessment instruments.

Seating is limited to 20 attendees. Eligible participants will receive a $500 stipend upon successfully completing the academy. Lunch will be provided.

Each workshop includes:

- Model lesson plans
- Cybersecurity principles
- Cybersecurity operations
- Incident response
- Risk management &assessment
- Secure communications
- Governance and compliance
- Disaster recovery and business continuity

Participants can expect to:

- Improve their knowledge of emerging technologies, products, and trends in the cybersecurity field
- Receive Instructional resources and regional workforce statistics
- Increase technical expertise and credentials
- Gain knowledge of how to engage with regional industry
- Build additional leadership skills
